

Subject: Applying for the Redux Developer Position - Alamgir Hossain

Dear Sir,

Reading your Oct 01 job posting on your website for the position of Redux Developer. Although I'm not fully familiar with redux, I believe my experience in the web development field is to be enough, and I'm pleased to submit my application for the position.

I'm very good with Bootstrap, Javascript, React, Node, MongoDB, and express js and I complete some full-stack projects with that language. For that, I'm very much confident that I can do as you require.

I have attached my [resume](#) to this letter. Through it, I hope you will learn more about my background, education, achievements, and projects.

If I can provide you with any further information, please let me know. I look forward to hearing from you about this opportunity.

Sincerely,

Alamgir Hossain

Professional Web-Developer
