Subject: Applying for the React Developer Position - Alamgir Hossain

Dear Sir,

Reading your July 01 job posting on your Facebook page for the position of React Developer. I believe my experience is a strong match for the responsibilities of this role, and I'm pleased to submit my application for the position.

I complete my course "complete web-development with Jhankar Mahbub". In that course, I learned of Bootstrap, Javascript, React, Node, MongoDB, and express js and complete some full-stack projects. For that, I strongly believe that I can do what you need from a react developer.

I have attached my **resume** to this letter. Through it, I hope you will learn more about my background, education, achievements, and projects.

If I can provide you with any further information, please let me know. I look forward to hearing from you about this opportunity.

Sincerely,

Alamgir Hossain
Professional Web-Developer
